Telescopic Hydraulic Gantries
SL, SBL, MBL-Series

No. 1 Choice by Heavy Lifting and Rigging Professionals
The Ultimate in Safety and Control

Stocked and Distributed by Norman Equipment Company 800-323-2710
Why Choose Enerpac Hydraulic Gantry?

Enerpac SL, SBL and MBL-Series Telescopic Hydraulic Gantry

- **Highest Quality**
  - Enerpac adheres to the highest quality standards and maintains rigid QA manufacturing processes
  - Lloyd’s witness tested to 125% of maximum working load.

- **Best Support**
  - Product training is available at our place or yours, to insure operators are fully trained prior to using the equipment
  - Our global staff is available to help anywhere the equipment may be in operation.

- **Proven Safety**
  - All Enerpac gantries comply to ASME B30.1-2015 and other Safety Standards
  - Advance technology and controls alert operator of unsafe conditions and stops gantry operations.

---

Precision Lift and Position of Heavy Loads

The Ultimate in Safety and Control

- **SBL1100 gantry used to assembling a hydraulic press.**

- **SBL1100 hydraulic gantry was deployed along with self-propelled transporters to unload and place the generator.**
Telescopic Hydraulic Gantries

Hydraulic Gantry Systems

Hydraulic Gantry Systems are a safe, efficient way to lift and position heavy loads in applications where traditional cranes will not fit and permanent overhead structures for job cranes are not an option.

Enerpac offers three series of Hydraulic Gantry systems:

- The cost-effective **SL-Series Super Lift** with best in class control and comparable capacity utilizing telescopic cylinders offered in 2 or 3 stages.
- The heavy-duty **SBL-Series Super Boom Lift** with capacities up to 10.484 kN ton and 3-stage lifting capability through the boom structure.
- The **MBL-Series Mega Boom Lift**, which incorporates all features of the SBL-Series and offers full lifting capacity over the entire stroke.

All Enerpac gantries are delivered with specific properties and control systems to ensure optimum stability and safety.

**Standard Features**

- Self-contained hydraulics
- Wireless Intelli-Lift controls
- Synchronous lifting and lowering
- Self-propelled wheels or tank rollers with synchronized travel.

**Intelli-Lift Control System**

The Intelli-Lift wireless control system is included with all Enerpac hydraulic gantries. The Intelli-Lift controller offers superior safety and control and includes the following features:

- Encrypted bi-directional communication that eliminates interference from other devices
- Remote operation using multi channel wireless (2.4 GHz) or wired (RS-485) control
- High and low speed settings
- Automatic synchronization of lifting with an accuracy of 24 mm (0.95 inch)
- Automatic synchronization of travelling with an accuracy of 15 mm (0.60 inch)
- Overload and stroke alarms
- Remote side shift control
- Emergency stop switch.

Capacity with 4 towers:

**600 - 10.484 kN**

Lift Height:

**3.4 - 14.5 meters**

SL-Series, Telescopic Hydraulic Gantry

Typical SL400 configuration with Skid Tracks, Header Beams and Side Shifts

- Build-in load holding valves to prevent drifting
- Double-acting cylinders with internal retract porting eliminate hazards to external plumbing
- SL60 and SL125 are provided with a hand crank to easily switch to free wheel mode
- SL400 utilizes same accessories as SBL-Series.

SL Series

Capacity with 4 legs:

- **600 - 4000 kN**

Lift Height:

- **4,70 - 9,14 meters**

**Skid Tracks**

Allows for easy levelling of the gantry tower and reduce ground bearing pressur. Available in two standard lengths, 3 and 6 m.

**Header Beams**

Sold in pairs and includes lifting points and fork pockets for easy positioning on gantry towers. Available in standard lengths of 8, 10 and 12 meters. Custom lengths available on request.

SL-400 Gantry during load testing.
Octagonal boom: provides added strength for increased capacity and lifting height

- SBL1100 and SBL900 have foldable boom to enable easy transport and setup

- SBL1100 and SBL900 have tank rollers to provide optimum load distribution

- SBL500 has fixed boom and steel wheels.

### SBL Series

**Capacity with 4 legs:**

- **5000 - 10.484 kN**

**Lift Height:**

- **6.9 - 12.0 meters**

#### Powered Side Shift

Electric propulsion controlled by standard gantry controls. Each set consists of 4 units.

#### Lifting Anchors

Designed to transfer the load to the top of the header beam. Can accommodate a 250 ton shackle or attach directly to the lifted load.

MBL-Series, Telescopic Hydraulic Gantry

**Typical MBL600 configuration with Skid Tracks, Header Beams and Side Shifts**

- Square corrugated boom: provides added strength for increased capacity and lifting height
- Full lifting capacity over full stroke
- Foldable boom to enable easy transport and setup
- Tank rollers to provide optimum load distribution
- Extra wide track gauge for ultimate stability.

---

**MBL Series**

*Capacity with 4 legs:*

**5000 - 6000 kN**

**Lift Height:**

**12.8 - 14.5 meters**

---

**Header Beams**

Sold in pairs and includes lifting points and fork pockets for easy positioning on gantry towers. Available in standard lengths of 8, 10 and 12 meters. Custom lengths available on request.

---

**Powered Side Shift**

Electric propulsion controlled by standard gantry controls. Each set consists of 4 units.

* Extends simultaneously through all stages with full lifting capacity at any height.
**SKID TRACKS**

Allows for easy leveling of the gantry leg, available in two standard lengths.

- Required to support and level gantry
- Provides load spreading to ground
- Includes lifting eyes and/or fork pockets.

¹ Each model number includes 4x propelled unit and cable guides.
² Custom heights available on request.

▼ Lifting Anchor

**LIFTING ANCHORS**
Designed to transfer the load to the top of the header beam. Can accommodate a 250 ton shackle or attach directly to the lifted load.
- Used to attach rigging to header beam
- Manually spaced to desired location.

<table>

</tr>
</tbody>
</table>

* LLSBL250 is built with two plates connected together and designed to use heavy duty shackle (not included). For shackles, see page 9.
Enerpac also offers a variety of optional accessories to complete your gantry system.
- Azobe wood timbers and transport frames
- Slings and shackles
- Side shift transport frames
- Tarpaulin covers.

Project Gallery

1. **TRANSFORMER INSTALLATION**
   - SBL900 gantry was used to transfer the transformer from the rail car to the heavy haul truck. Once at the sub-station, the gantry was used to install the transformer on its platform.

2. **TRANSPORT OF 120 TON MACHINE BED**
   - Using the hydraulic gantry’s Intelli-Lift wireless control system, operators were able to swiftly and easily lift the machine bed with the SBL500.

3. **TURBINE AND GENERATOR INSTALLATION**
   - SBL1100 Super Boom gantry lifts 280 ton turbine and 214 ton generator over 5 meters, and positions on concrete foundation at a new power plant in Libya.

4. **TRANSPORTING A 1200 TON HYDRAULIC PRESS**
   - SL400 hydraulic gantries off load, transport, tilt and lift the press to its new foundation on the second floor mezzanine.

5. **TURBINE LIFT AND LOAD-IN**
   - Once the turbine was lifted a trailer was positioned under the hydraulic gantry with a SBL1100 gantry at shipping port.

6. **OFFLOADING A HYDROCRACKER**
   - Two SBL1100 gantry systems lifted the 1300 ton hydrocracker off the barge onto a Self-Propelled Modular Transporter (SPMT).

7. **ASSEMBLING OFFSHORE PLATFORM OIL RIG MODULES**
   - An SBL1100 gantry was used to safely lift and position four 700 ton modules with precise accuracy during the oil rig construction.

8. **TRAVEL GANTRY**
   - The Enerpac travel gantry is a self-folding rubber tire gantry with a 60 ton lifting capacity. It features self-contained hydraulics, telescopic cylinders and wireless controls. The travel gantry combines the safety and efficiency of a hydraulic gantry with the ease of use of a SPMT.

9. **VERTICAL CASK TRANSPORTER**
   - The Enerpac vertical cask transporter combines the lifting capability of a hydraulic gantry with the flexibility of a self-propelled modular transporter (SPMT) to provide safe handling of nuclear casks at spent fuel storage facilities.
When your application requires something other than our standard product offering, look to Enerpac’s Heavy Lifting Technology, Experience and Expertise.

Our group of engineers, designers and specialist, will work with you to understand your specific application and provide a turn-key solution that will exceed your expectations.

**ENGINEERING**
Enerpac has a multi-disciplined engineering team capable of design and development of all aspects of a heavy lifting system. Leveraging design and application experience with the latest in computer software, rapid prototyping and analysis methods ensures delivery of the highest quality systems.

**ELECTRONICS**
Enerpac designs all control systems in-house. This capability keeps control technology close to the design engineers who are developing the rest of the system. In doing so, we can tailor the control system to match unique project requirements.

**MACHINING**
Enerpac utilizes the latest in CNC machining technologies and manufactures all large and special hydraulic cylinders in-house. We can machine diameters up to 1000 mm with lengths to 6000 mm.

**HYDRAULIC POWER UNITS**
Enerpac designs, assembles and tests small to large hydraulic power units in-house. Power units range from 0.5 to 240 kW and are tested with the system they are intended to operate.

**FIELD SUPPORT**
Enerpac Heavy Lifting is available to provide on-site support including training and troubleshooting of systems. We also stock repair parts and consumable items at several locations to ensure fast delivery and minimal downtime.

**STEEL FABRICATION**
Enerpac has a dedicated facility for steel fabrication and welding. We design and manufacture custom structures used in demanding heavy-lifting applications.

**MAINTENANCE and REPAIR**
Due to the unique nature of Enerpac Heavy Lifting Technology, we offer complete maintenance and repair services. Our M&R group is available to assist customers who do not have access to local service facilities qualified to work on these systems.

About Enerpac
Enerpac is the leading global provider of high-pressure hydraulic tools and solutions with a broad range of products, local expertise and worldwide distribution network. With a proven track record in a wide range of markets, Enerpac designs and manufactures high-quality tools and solutions for all industrial applications.

Enerpac has gained unique experience in delivering hydraulic solutions for the controlled movement and positioning of heavy objects. Enerpac supports your business by offering the right solutions and service to help you get your work done efficiently and safely.

Heavy lifting and rigging equipment
While Enerpac has the world's largest product portfolio for heavy-lifting and load-control applications, we also have the knowledge to put all these programs together or modify them to provide a lift system for your most demanding and unique applications.

- Synchronous Lifting Systems
- Jack Up Systems
- Bridge Launching Systems
- Synchronous Hoisting Systems
- Hydraulic Gantries
- Heavy-Lifting Strand Jacks
- Skidding Systems
- Self-Erecting Towers
- Chain Pulling Systems
- Self-Propelled Modular Transporter.
